#### INTRODUCTIO N

ABILIY Group of company is uncompromising with respect to quality, excellent services and safety. We focus on developing long term client relationships through proven execution. Our goal is to provide maximum value of our client's investment.

On behalf of the ABILITY Group it gives me great pleasure to extend my thanks and appreciation to our esteemed clients, colleagues and partners who have contributed to the dynamic growth and development of the Group's operations.

The mission of ABILITY Group is to serve the needs of our clients by providing the best quality products and services available.

Our aim is to be the leading integrated solutions provider to the industrial and infrastructure sectors in UAE and all middle east countries, creating value for stakeholders and the local community.

ABILITY's policy is based both on the qualities of the individual divisions and on the combined strengths of the Group.

The foundation for the ABILITY Group's success is based on the principles of excellence and integrity, with a deserved reputation for performance and commitment to our clients.

We remain firmly committed to actively participating in the economic growth and advancement through our local manufacturing, construction, service and management activities.

Engr. Adnan Daboul Chairman, ABILITY Group

### WHAT WE DO?

**W**hen smooth and reliable power is critical to your operation, Al Qudrah Switchgear can design, manufacture and support the hardware at the centre of it all.

From Control Panels and Switchgear to Auto Changeover Systems and Power Factor Correction Equipment, Al Qudrah Switchgear can create a solution that perfectly matches your needs.

And for the ultimate in efficiency and reliability, you can even call on us to create a complete custom Package Substation. By employing flexible modular construction with minimal cabling and reduced civil costs, we'll help you get maximum performance for the minimum outlay.

#### There are lot of reasons why!

You don't want "cheap "switchgear... but you want value for money. our completely custom solutions mean you never pay for features you don't need and our buying power means we can source great deals and pass the savings on to you.

#### Encyclopaedic knowledge you can depend on

From our sales team to our technicians and engineers, you'll find a mine of information at your disposal. From advice and guidance on the best solution to meet your needs to ongoing support. Technical development and further customization, we have the knowledge and the ideas to make it happen.

#### Complete full-range service, all in one place

Al Qudrah Switchgear can design, manufacture, install, test and maintain your switchgear and control panels. We can custom modify switchgear from just about any manufacturer so that it better suits your needs – and we can even upgrade our own previous systems. Why invest in new switchgear when we can help you get more mileage from your current system?

#### Maximum service, minimum fuss

For years, we've designed and installed thousands of switchboards and control panels for all markets. It's the heart of what we do... and we're good at it! To you, that means getting the ultimate solution with the minimum disruption to your business. Fast installation, rapid (but thorough) testing and all the support you need.

#### Cast - iron Guarantee

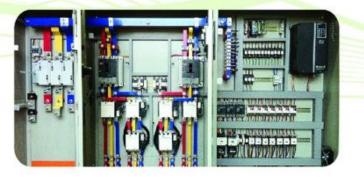

Every solution we provide is backed by our comprehensive 12 month warranty. Off course, we don't expect you'll need it, but your peace of mind is assured with the knowledge that should the slightest fault occur, we'll be there to fix it for you. Customers satisfaction is the key, this is why our customers come back time and time again.

### **OUR EXPERIENCE**

### **OUR SERVICES**

With wide - ranging experience and an expert team,Al Qudrah Switchgear ca ou to create a system that does exactly what you need it to encyclopedic knowledge of both materials and, manufacturing process mean we can help you bring your system in on brief, and on budget.

### **MANUFACTURE**

Built "in-house" by our team of highly skilled technicians, your switchgear and control panels are guaranteed to stand up the latest industry standards. What's more, we'll liaise with you throughout the build to ensure that your requirements stay at the very top of our agenda. Complex Al Qudrah Switchgear panels need to be rigorously tested before you know you can trust them to deliver their full potential. Using our expertise and experience, we can test, check and verify every element of your switchgear system to ensure faultless operation...and we can provide you with method statements, risk assessmentsand even operating

### **MAINTENANCE**

Our ongoing Preventive maintenance Programmes deliver security and peace of mind guaranteeing you minimal down time and maximizing the operational efficiency of your IV switchgear for a very modest investment. And should your switchgear fail, you can call on our team of experienced engineers to attend on site, diagnose the issue and provide a fast and effective remedy. Keeping downtime to an absolute m i m u m .

## **PRODUCTS**

Smart functionality is gradually integrating industrial machining processes and maintenance with broader factory IT systems. As digital factory data intuitively links with machine networks, they build intelligence that will eventually connect the shop floors of machine tool manufacturers with those of machine tool users.

The Industrial Electric Automation Department of ABILITY is specialized in R&D of industrial control and automation technology, engineering design, system integration and engineering commissioning. With sophisticated technologies and excellent service, ABILITY provides customers from various industries with solution to production automation, electric automation and field instrumentation, and offers them comprehensive engineering technical services like model selection, configuration, engineering design, system integration, software programming, field commissioning and technical training from developing and designing stages to installing and operating stages.

#### Electric

Electric team combines the features of process and system with customer's need to design various types of high & low voltage distribution box and field distribution box, which provide reasonable protection to power supply of industrial electric equipment and interlock circuit to process control. Meanwhile, it designs construction drawing of electric control system and offers instruction to field installation and commissioning based on general engineering drawing in accordance with related industrial and national standards.

The company is well experienced in automatic control system design and implementation in environment protection industrial procedures, with good knowledge about all kinds of industrial spots, and control systems like DCS/PLC and advanced intellectual instruments, such as Siemens, DELTA. It also adopts open multi-field bus like EtherNet/IP, ProfilBUS-DP, ControlNet and Genius successfully to make up redundant and non-redundant web system among several environment protection wastewater treatment systems, exhaust gas treatment system and acid purification system, realizing collection of switching value and analog quantity data involved in distant I/O, transmit data to central control system through process control network, design and develop control program according to progress requirements to realize various processes, and design and develop upper process monitoring network to carry out centralized monitoring, management, automatic sequence control and exchange data with information layer with IPC or touch screen as man-machine interface. The operation interface provides customers with complete and powerful information center, through which operators may carry out manual intervention like latch/unlocking, stepping, delay, pausing to the program and be aware of the program implementation status timely, for example, type of program implemented, implementation progress, and current status of the program. Based on the progress condition, the instrumentation best fit for the field will be selected to measure various progress running data steadily and transmit signals to control system so as to ensure easy integration of various on-spot equipments from servers on plant management web, and maximum integration of on-spot data, to realize three-level control including equipment, workshop and the plant.

Something of the state of the s

As a business unit of **ABILITY TECHNOLOGY** ., we uphold the highest of standards in safety for industrial control equipment and enclosures for electrical equipment.

Industrial Automation offers Industrial Process Controls for areas such as manufacturing, water treatment, and petroleum. Our UL 508A Listed panel shop allows us to provide both control components and peripherals to our clients.

We use our technological expertise and efficient operations systems to provide automated industrial controls and controls accessories such as relays, motor starters, and controllers in order to obtain efficient building automation. Industrial Automation combines hardware, software, and communication components to control customer industrial and manufacturing processes

# OUR COMMITMENT to earning your trust back

### **Automat the Impossible**

ABILITY provides customers from various industries with solution to production automation, electric automation and field instrumentation and offers them comprehensive engineering technical services like model selection, configuration, engineering design, system integration, software programming, field commissioning and technical training from developing and designing stages to installing and operating stages.

# ASTA Certificate of Verification Tests

Laboratory Ref. No: WO-1718-008100 / ERDA-00213669 and ERDA-00213670

APPARATUS: 2500A, 415V/800V/8kV (Ue/Ui/Uimp) 50Hz extendable (at both ends) Power

Switchgear and Controlgear Assembly incorporating a three-phase and neutral horizontal and vertical tinned copper busbar system with one incoming ACB unit,

two outgoing MCCB units and a protective circuit.

DESIGNATION: 2500A MDB / MCC

MANUFACTURER: AL QUDRAH SWITCHGEAR IND LLC, Emirates Industrial City, E611 road, Shed

No. 5, P.O. Box: 26432, Sharjah, U.A.E

TESTED BY: Electrical Research & Development Association,

ERDA Road, Makarpura Industrial Estate, Vadodara-390 010, Gujarat, INDIA.

DATES OF TESTS: 19th August to 28th December 2017

The apparatus, constructed in accordance with the description, drawings and photographs incorporated in this certificate has been subjected to the series of proving tests in accordance with

#### IEC 61439-2: Edition 2.0 2011-08 and BSEN 61439-2: 2011

Verifications with reference to the tests listed in Annex D of IEC 61439-1: Edition 2.0 2011-08

1: Strength of materials and parts 9: Dielectric properties

2: Degree of protection 10: Temperature-rise

3: Clearances 11: Short-circuit withstand strength

Creepage distances 12: Electromagnetic compatibility

5: Protection against electric shock 13: Mechanical operation 6/7/8: no verification by testing required

#### For ratings assigned by the manufacturer and verified by test see ratings pages A, B and C

The results are shown in the record of Proving Tests attached here to. The values obtained and the general performance is considered to comply with the above Standard(s) and to justify the ratings assigned by the manufacturer as stated on the ratings page(s).

This certificate applies only to the apparatus tested. Responsibility for conformity of any apparatus having the same or other designations rests with the Manufacturer.

This certificate comprises this front sheet, 3 ratings pages plus 110 other pages including 6 drawings as detailed on pages 2 and 3.

Only integral reproductions of this whole certificate or reproductions of this page accompanied by any ratings pages are permitted.
